**Generation Smartphone spricht Klartext: Was geht uns der
demografische Wandel an?**

Peter Tirler,

Student, Absolvent Realgymnasium Meran

ABSTRACT

In my speech I take the view that the demographic change has an essential influence on basically every aspect of our modern-day lives, and confronts all generations, and especially Generation Smartphone with several challenges. This however has to be perceived as an opportunity to grow rather than a problem, and I am confident that Generation Smartphone will prove capable of mastering these challenges. In order to ensure that our generation is able to address the upcoming shifts in society, I already appeal on the current political leadership to support the creation and growth of families and thereby increase the rates of birth, and to make sure young South-Tyroleans have the possibility of creating themselves a future in South Tyrol and are not forced to emigrate.
